

GO GREEN

GO GREEN

PRESERVING TOMORROW

We are committed to offering promotional gifts that aid companies in connecting and fostering long and fruitful relationships with customers. The promise of a sustainable future is built on the pillars of the present's decisions, this is why the GO GREEN collection was created. These natural, sustainable or eco-friendly products provide options to lessen your environmental footprint, and to offer budget-friendly green alternatives to traditional items.

RESPONSIBLE GIFTING

The many materials of GO GREEN promotional gifts are carefully selected for the benefits they bring to production processes and people's habits. The use of recycled materials greatly reduces the harmful effects of the manufacturing process, helping in resource conservation, energy saving and waste reduction. In addition, the utilisation of natural materials results in more durable items that can be used by customers for longer periods of time. These sustainable components help conserving natural resources, reduce carbon footprint, and are often renewable or biodegradable. The high-quality materials that GO GREEN gifts are made of grant positive environmental and lifestyle effects, making them shining symbols of responsibility.

GO GREEN

SHOWCASING AWARENESS

The message that GO GREEN products convey is certainly to the advantage of any kind of corporate image. Commitment to sustainability and environmental awareness shows a forward-thinking attitude that can make brands stand out in a positive light. As we all aim to make more conscious decisions day by day, keeping in touch with sustainability trends greatly enhances brand perception, fostering trust and loyalty. Moreover, environmental engagement can become a fundamental part of corporate social responsibilities and the values they convey. To assist in showcasing this message, GO GREEN products are marked with unique material logos and labels.

This e-catalogue contains a highlight of our GO GREEN products, and only a segment of our full product collection. Please refer to our contact information for more options.

MORE OPTIONS THAN EVER

Thanks to the GO GREEN collection, many of our traditional products have been given eco-friendly versions. GO GREEN items not only provide more options to already popular products but enhance the offering and customisation possibilities of BE CREATIVE gifts as well. Our collection is expanded with new materials every year, giving way to a large number of recycled items in 2024. Find a highlight of our GO GREEN materials on the next page, and even more throughout the catalogue.

CREATIVE ENVIRONMENT

Many of our GO GREEN items are also part of our BE CREATIVE collection. These promotional gifts provide opportunities to customise their whole surface with unique corporate graphics to make them truly stand out. We develop our BE CREATIVE items with their environmental impact in mind, and we aim to offer more customisable products that are made of recycled or renewable materials year by year.

BE CREATIVE graphics on the products of this catalogue are only exhibited for the purpose of displaying printing possibilities and are not reference for sale. Accordingly, products are merchandised blank or imprinted with the customer's graphics.

The right is reserved to deliver products that differ, in execution and in colours, from items illustrated in this catalogue. The displayed product printing parameters may differ from actual possibilities.

Products are delivered without decoration and battery, unless otherwise indicated.

RECYCLED *Aluminium*

THE AGELESS ELITE OF METALS

Aluminium can be infinitely recycled, without any loss in quality. Its recycling reduces waste production while conserving 95% of the energy used to extract new metals. It's a reliable material, the use of which results in quality products that stand the test of time, thanks to their strong composition and exceptional durability. The lustrous, premium and modern look and feel of aluminium gifts never fails to convey a sense of certainty and strength.

Stainless Steel

STAINLESS
STEEL

METAL OF HONOR

Stainless steel products often have a lifespan of several decades, as valuable alloys can be extracted and recycled through melting, without deterioration in quality from product to product. Recycled stainless steel is the unbeatable material of food and drink accessories, due to its naturally antibacterial quality and high heat tolerance. The many different strengths of steel make these items greatly valued for their purity and performance.

PET RECYCLED

RPET 

THE STYLISH KING OF RECYCLING

PET is the most often recycled plastic in the world, commonly reused for a countless number of promotional products. PET plastic is 100% recyclable and can be used again and again without any decrease in its characteristics or quality. RPET items are easy to clean, have good resistance to breakage and their production generates less carbon footprint. Promoting with RPET products is one of the cheapest ways to demonstrate environmental stewardship.

RECYCLED *Polypyrrolene*

THE MOST NEUTRAL PLASTIC

Polypropylene (or PP for short) is a recyclable thermoplastic polymer that is highly versatile and resistant to a wide range of acids and chemical solvents. Broad functionality makes recycled PP ideal for making home accessories, while its food-safe quality allows it to be used for producing foodware and drinkware. Simple composition makes recycled PP extremely eco-friendly among its plastic counterparts, producing innovative and stylish items.

RECYCLED *Polystyrene*

THE WHITE CANVAS OF PLASTICS

Polystyrene (or PS for short) is a colourless, tasteless and odourless plastic. It can be shaped very precisely during its production and recycling process, granting great diversity in design. PS recycling contributes to the reducing of plastic waste sent to landfills, leading to significant environmental benefits. Products made of PS are not easily destroyed, providing highly sustainable items due to their hardness and rigidity.

EcoAllene

MULTI-LAYERED TURNAROUND

EcoAllene is a new and innovative material derived from recycling objects which would otherwise end up in incinerators and landfills, such as cartons and packaging. The innovation lies in the waste being kept aggregated in a new formula through a patented process. Everyday items made of EcoAllene are perfect for promoting the technological advancements of recycling methods, conveying a forward-thinking attitude for any kind of brand.

Leather **RECYCLED**

REPURPOSED QUALITY

Recycled leather is made using old products, mainly scraps and residues from leather production. It has a look and feel very similar to regular leather but is more sustainable as it contains only 10-20% animal hide. Show some dedication to eco-consciousness by using recycled leather items in marketing campaigns and inject some elegance while you are at it!

Fostel
AP733413

Glass

RECYCLED

REFLECTIVE BEAUTY

For its recycling process, glass is collected, processed, and remanufactured to create new products, reducing the need for raw materials and energy used for glass production. This sustainable practice helps to conserve resources, decreases landfill waste, and lowers the environmental impact associated with glass manufacturing.

Paper

RECYCLED

PRESERVER OF WOODLANDS

Paper recycling is not only one of the best ways to promote the ecologically friendly attitude of a company, but also one of the most impactful green processes. Paper recycling reduces harmful gas emissions, reduces water consumption and energy consumption, greatly extends fibre supply and reduces landfill space. The versatility of recycled paper results in a wide variety of promotional gifts such as bags, pens, notebooks and other kinds of stationeries.

Cotton **RECYCLED**

A REPROCESSED TOUCH OF SOFTNESS

Cotton is one of the most regularly used natural fibres, the perfect material for soft, comfortable and breathable fabrics. Its recycling process converts it into cotton fibres, which can be repurposed for natural-looking promotional items such as bags, backpacks, pouches, cosmetic accessories, and many more. Give a gentle touch to marketing campaigns with recycled cotton products and gift something practical and comfortable for a lasting impression.

Cork

THE RUGGED WRAP OF TREES

Do not miss out on cork products, crafted from the renewable bark of cork oak trees. Cork is lightweight, impermeable to liquids and gases, elastic and compressible, and provides thermal and acoustic insulation. These attributes make cork an unexpectedly useful material for tasteful promotional gifts, while its biodegradability and recyclability reflect a deep commitment to environmental responsibility.

Bamboo

THE REPLENISHING STEEL OF NATURE

Bamboo is one of the fastest-growing evergreen plants, capable of complete regrowth within one year. Besides being nature's most renewable and most sustainable grass, its strength and unique look make it a perfect material for tasteful and long-lasting promotional gifts. The lightweight property and natural elegance of bamboo makes it perfect to be used in unison with other materials and makes sure that these promotional items never go out of style.

WHEAT STRAW *Plastic*

GRAIN-GROWN FORTITUDE

Crafted from renewable agricultural by-products, wheat straw plastic goods showcase a rustic aesthetic with gentle, earth-toned hues. Through the utilization of surplus straw from wheat cultivation, these products reduce waste and dependence on non-renewable energy sources. They decompose more rapidly than conventional plastics, seamlessly blending fashion with tangible environmental advantages.

Hemp

A woman with long, wavy brown hair is smiling and holding a large, green hemp leaf in front of her face, partially obscuring her eyes. The background is a soft-focus outdoor scene. A large, stylized hemp leaf logo is visible in the upper right corner of the image.

LOW-IMPACT FABRIC

Hemp has one of the most tear-resistant organic fibres. They are harvested from environmentally friendly plants that require minimal water and no pesticides. Unlike other fabrics, hemp becomes better with age, the more you use it, the softer it gets. Its antibacterial and water-absorbent qualities make it a superb material for top-quality shopping bags and cosmetic bags.
